Professional Summary

Results-driven **ISTQB Certified Senior Test Engineer** with **8+ years of experience** in **manual, automation, API, and database testing** across Insurance, Banking, and Financial Services domains. Skilled in **Python, Selenium, typescript, playwright, SQL, Postman, Git, and Jenkins**, with proven expertise in automation frameworks, backend data validation, API validations, and continuous integration testing. Strong problem-solver with a track record in **defect management, CI/CD pipelines, and Agile delivery**.

TECHNICAL SKILLS

Automation & Frameworks: Selenium WebDriver (Python), Playwright with Typescript

API Testing: Postman

Database: SQL, MySQL,

CI/CD & Version Control: Git, Jenkins

Defect Tracking & Test Management: JIRA, qtest, Zephyr

Methodologies: Agile (Scrum), SDLC, STLC,

Work Experience

CBA Services India Pvt Ltd | Test Engineer

📍 Bangalore, India | 📅 May 2023 – Mar 2025

Project – Collections

- Created detailed and comprehensive test cases based on functional specifications.
- Conducted functional testing to ensure software modules perform as expected.
- Automated functional and regression tests using **Playwright + Typescript** and used **Python+Selenium** for test data preparation

- Used defect tracking tool **Jira** to log, track, and update reported issues.
- Embedded as a Quality Engineer within Agile Scrum teams, ensuring quality was integrated into every stage of development.
- Defined and executed end-to-end test strategies across functional, integration, regression, and non-functional domains.
- Built, maintained, and expanded API/UI automation frameworks using Playwright, TypeScript
- Performed manual and exploratory testing to validate user experience, business logic, and edge cases not yet automated.

SLK Software | Senior Test Engineer

📍 Bangalore, India | 🗓️ Oct 2021 – Nov 2022

Project – CNA Insurance

- Created and executed testcases related to policies in TAP and involved in testing at pre prod environment.
- Participated in downstream systems testing process.
- Wrote **SQL queries** for backend and downstream testing.
- Executed Testcases as part of Regression after every release.
- Logged and tracked defects in **JIRA**, with retesting after fixes.
- Generated **daily/weekly reports** for stakeholders.

Sun Technology Integrators Pvt Ltd | Senior Test Engineer

📍 Bangalore, India | 🗓️ May 2016 – Oct 2021

Projects:

- **RxAAP** → Created test plans, executed test cases, validated backend data using **SQL queries**.
- **Phoenix** → Built **Selenium WebDriver automation**, integrated execution with **Git + Jenkins** for CI/CD.
- Validated backend datasets using **SQL queries**, supporting ETL and data integrity testing.

- Performed API testing using **Postman**, validating request/response payloads, headers, and status codes.
- **Unsecured Credit Risk (UCR)** → Managed test cases in **qTest**, performed **API testing with Postman** and **SQL-based database testing**.
- **ETL 4.X Upgrade** → Designed and executed **system/SQL-based test cases**, performed defect tracking.

Education

🎓 **Bachelor of Engineering (BE)** – KIT Tiptur (2010 – 2014)

Certifications

- **ISTQB Foundation Level Certified**
